According to the Namibian Standards Institution (NSI), a standard is a document approved by a recognised body that provides for common and repeated use, rules, guidelines or characteristics for products or related processes and production methods. It may also include or deal exclusively with terminology, symbols, packaging, marking or labelling requirements as they apply to a product, process or production method. Although compliance is not mandatory, it is advisable to contact the NSI today as they are the country's organisation representing standards and quality assurance for Namibia at regional and international standardisation bodies.
